# Design

Have a search bar for users to look up any cafe/restaurant

As a dropdown Include pictures include: of establishment nutritional value, as well as dishes every ingredient, and allergens

Allow access for

users to leave

reviews and

personal

experiences

Include up-to-

date menus of

each

establishment,

also include last

updated date.

Have a counter

for how many

times food

orders/requests

have messed up

Include filters for select food concerns

Always ask user for feedback on meal after dinning

### **Solutions**

Each dish from establishment must be marked with respective allergen and dietary restriction (even small details like cross contamination)

All ingredients must be listed, and write nutritional values of dishes

Maybe have speed dial button for emergency services?

Should include any and all updates/changes to dishes

Should include any and all updates/changes to dishes

User can make profile with all concerns and app should automatically show results

Maybe also include a recipe tab where app shows users how to make meals that fit their concerns

#### **MISC**

User privacy concerns, because user location would be required

for the app?

Would people

How to make

more people

aware of app?

actually use it Hiring food critics over just googling it? How to make it more convenient

Should a special order tab be made? So user can express restrictions to chefs

More privacy concerns for user because making profiles would be recommended

than google.

## **Potential Issues**

Including nutritional value (with calories) promote/trigger eating disorders

How to promote all people to use app in order to strength usefulness?

Restaurants with secret/passed down recipes?

How to make app include ALL establishments (even small/start ups)? Food Trucks? Fair food?

Difficult to include ALL establishments, especially to

How to get restaurants to comply with all the criteria?

differentiate by

location

If changes are made frequently how to make sure app stays up to date?

Restaurants can make same food differently depending on location, how to accommodate?

#### **Add Ons**

Possibly include a review/ commentary like Yelp for restraurants

Add ways to fill out surveys so app can better itself over time.

Include app customizations, and ways to favorite restaurants

Include delivery/ pick up options were you can order ahead, and app will automatically adjust based on dietary needs

Add ways for users to login and create profiles so app can be customized for

their needs
